

Invitation

2nd Brainstorming Research Assembly for Young Neuroscientists

Extracellular Vesicles in Neurological disease

Activity Description:

- Discover how to overcome the challenges in analysing EVs by evaluating expression profiles with the droplet digital PCR
- During the workshop we will describe the technique, the workflow and all the key methodological advantages

Date: 14th of November

Time: 18.40 to 19.10 pm

Location: Mario Negri IRCCS Institute

If you want to read a little bit more about our technology we recommend visiting our [website](#) where you will find insightful information about our applications including the ddPCR basic introduction, the Droplet Digital PCR applications guide, [webinars](#), testimonials, [publications](#), and many other great resources.
