

Miltenyi Biotec is glad to invite you to the seminar:

Novel approach to study adult neural cells in vitro

Agenda:

- **Introduction to Miltenyi Biotec complete workflow for neuroscience research**
 - **Efficient and gentle neural tissue dissociation**
 - gentleMACS™ dissociator and tissue dissociation kits
 - Get viable and clean cell suspensions from adult and neonatal brain
 - Inflamed brain dissociation workflow
 - **Easy and fast neural cell isolation**
 - MACS Technology for cell separation
 - **Examples for downstream applications**
 - Flow Cytometry for neuroscience research
 - The new generation antibodies: REAfinity and REAlease Antibodies
 - **Light sheet microscopy and 3D imaging**
 - Explore the cellular details in high resolution while keeping the overview of your complex sample.

15th November 2019

12:00 a.m.
